This map was compiled by the U.S. Geological Survey, using aerial photography taken in November, 1969. Original Land Office data, road inventories, and other map data.

This map was prepared on the Universal Mercator projection, East Zone, Florida system of coordinates.

The railroad station symbol shown on this map does not necessarily denote the presence of a station on the facility. It may be only a point designated for the receipt or delivery of freight, such as a siding or siding.

No attempt has been made to show all drainage canals and ditches.

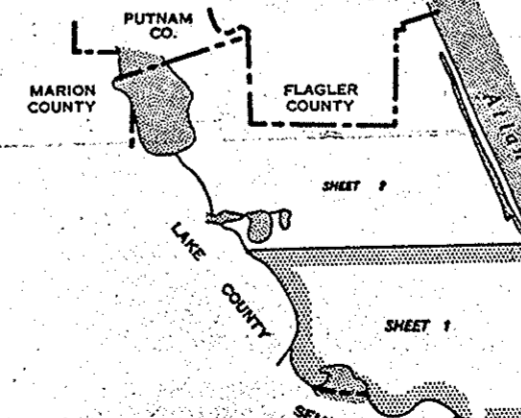

Due to insufficient space land grants will not be identified by name on this county.

City populations are from the U.S. Census for 1970.

1970 Volusia County population is 108,427. There are 1,118 square miles in the county.

Permission to copy or reproduce this map must be authorized by the State Topographic Office, State of Florida, Department of Transportation, Tallahassee, Florida, 32304.
